VALUE ENGINEERING AT LEEMcCULLOUGH

*“An engineer is someone who can do for ten shillings
what any fool can do for a pound”*

- Neville Chute

Services

At LeeMcCullough we offer a comprehensive Value Engineering Service on civil and structural matters - we have experience working with main contractors, sub-contractors and specialists in this regard.

We are conversant with the requirements of our role as advisors and are adept at rapidly converging on the optimum solution that maximises cost efficiency without compromising either quality or health & safety.

Key staff members are Chartered Engineers, Fellows of the Institution of Engineers of Ireland, and qualified to doctoral level. This enables us to report with authority on complicated technical matters.

Our staff routinely produce specialist reports, and are experienced at examining innovative cost-effective alternatives and demonstrating compliance with the building regulations to facilitate approval.

Our strength in this role lies in the qualifications, competence, expertise and experience of our staff members - this expertise covers civils, structures, geotechnics, highways, landscape, fire safety, disability access, and conservation.

We are members of the Association of Consulting Engineers of Ireland. Our office is quality accredited to ISO 9001:2008 and regular audits by the accreditation agency (BMTrada) affirm that we maintain the highest standards of professionalism.

We have earned a reputation for fair and impartial advice. We pride ourselves on our effective team participation, and on delivering a truly professional response on time - every time.

VALUE ENGINEERING SERVICES

FOR MORE THAN 40 YEARS, WE AT LEEMcCULLOUGH HAVE BEEN PROVIDING VALUE ENGINEERING SERVICES FOR CONTRACTORS ON A WIDE RANGE OF PROJECTS.

KEY ASPECTS OF OUR SERVICES ARE:
